OF THE

Chart and Quadrant Store
OF

EDMUND M. BLUNT,

No. 202, Water-Street, Beekman-Slip,
NEW-YORK;

Where Compasses, Sextants, Quadrants, Spy-
Glasses, Telescopes and Log-Glasses are re-
paired; and all Nautical Instruments, Books
& Charts are purchased, sold & exchanged.

E. M. Blunt's respectful compliments to
those gentlemen who navigate the Coast of North
America, and solicit from them all nautical improve-
ments.

958-1

JOURNAL

OF A VOYAGE

FROM *New York* TOWARDS *the South Sea*
in the Ship Sea Fox

Command Janning

by

D. Mackay

D. Mackay

NEW-YORK,

Printed by EDMUND M. BLUNT, at the QUADRANT, 202, Water-Street, corner Beekman-Slip, where Nautical Gentlemen are respectfully invited who wish a supply of Sextants, Quadrants, Spy-Glasses, Charts, Pilots, Bowditch's Practical Navigator, Blunt's American Coast Pilot, Abbot on Shipping, Ship-Masters' Assistant, Nautical Almanacs, Seamanship in theory and practice, Walsh's Mercantile Arithmetic, and every article in the stationary line useful at sea.

Compasses and Quadrants repaired, and Cash given for correct Quadrants.
August, 1815.

JOURNAL

OF A VOYAGE

FROM THE BAY OF FUNDY TO THE BAY OF LABRADOR

IN THE YEAR 1845

BY J. H. COLEMAN

OF THE ROYAL CANADIAN MOUNTED POLICE

AND

1						Floated out our boat & Capt. Fanning, and all hands except the 4 th mate, Rousseau. Steward & Cook went on shore to procure hogs, geese &c - saw four of the former of which we killed one, twenty geese & 4 Misses ducks. West Point island has been recently burned over which has rendered the hogs poor by destroying the tussocks & other vegetation on which they principally subsist. I saw some wild geese, & ducks, the latter only where there had been some shelter or concealment establishment. The island abounds with rabbits, both grey & black, the highland, & lowland geese as also brought in English Snipes, Ducks of various kinds, Gulls, and many handsome small birds, besides the Porcupine, Albatross, Roofs & various birds usually found upon the land in high southern latitudes. In the morning went again upon a hunting party in which I killed two hogs - the crew & pigs

Sunday

Ship

from

towards

H.	K.	F.	Courses.	Winds.	Lee-way.	Remarks on board the	Day of
1							
2						Fair weather & fresh breeze, at 7 ³⁰ AM	
3						entered the passage between Saunders and Kipples	
4						to anchor in 8 fathoms - the E. Pt. of Saun. island N. 1/4 S. a small cove where	
5						once stood the English settlement, N.W. three or four cable length distant	
6						a bluff Pt. S.W. - we were the same distance	
7						went on shore to hunt, but met with poor success, as	
8						we shot but 4 quail -	
9						Here is the site of the town, founded by the British government - the remains of the houses	
10						gardens, & a walled belt of massive rocks - On viewing these deserted ruins, we reflected	
11						scarcely of the latter day - a monument of mankind which the English & Spanish nations erected	
12						as a way to the islands of which the population, or till to these islands, now abandoned -	

1						Through the night Pleasant with light breeze varying from N.W. to N.E.	
2						Morning, the wind & weather continued much the same - at 3 AM began to heave in the	
3						cable but so rough was the bottom we did not get the anchor to the bow till 9	
4						Made sail & steered for the S.E. point in sight, of Kipples island - at 7 rounded the	
5						Pt. of Saun. island N.W. E. about 1/4 mile opposite a fine harbor - opposite	
6						which is on the S.W. point of the channel are some reefs - The Eastern remarkable	
7						hill of K. island lies N.W. from this harbor and is near it, a dangerous reef off the	
8						E. Pt. of K. island. A vessel should be in with the land to avoid wind of Pebble	
9						island lies & wish soon to make a harbor or pass the sound out to the E. end of P. island	
10						she would do well to run for this - then around the E. Pt. of the island giving a berth	
11						to the reef off it & with the wind to the South. She would soon work into	
12						a snug harbor.	

Course.	Dist.	Diff. Lat.	Dep.	Lat. by D. R.	Lat. by Obs.	Mer. Dist.	Diff. Long.	Long. in.	Bearing and Distance.
two or three rocks seen from this position appeared situated in the center of the Strait -									
at 9 ³⁰ entered it and although the ship was going at the rate of 6 knots, so strong was									
the current of tide against us that it was 11 ¹⁰ before we gained a half cable length									

H.	K.	F.	Courses.	Winds.	Lee-way.	Remarks on board the	Day of
1						The breeze then freshening on the tide slackened and she shot out of the strength	
2						of the tide - Passed the rocks off the small islet at about a cable length to	
3						steered E. into a handsome sound included in the appellation of Tassers' pass.	
4						Course out the entrance of the narrow or Strait S.E. - around the rocks E. or S. of	
5						neat lies about a quarter of a mile distant (perhaps not half that) from the above	
6						rock, & nearly as the small islet & rocky range - The passage is believed to be	
7						just the rocks a little of a cable length - There is generally 5 feet	
8						water in the narrow - the least we got was a greater than, and that near the	
9						reefs, on the S.W. shore.	
10							
11						Off the two next Pt. on the S.W. side are	
12						extension, & narrow reef - running to the N. in the direction of the point.	
1						Steered around in the direction of the South shore of Pebble Island	
2						keeping it much nearer about than the land on the Star. hand, & they	
3						gave the reef a good look - At midday the S.E. part of P. island	
4						in sight, bore about E. 2 1/2 miles distant - The abt. tide here in our favor

									<i>New York</i>

H.	K.	F.	Courses.	Winds.	Lee-way.	Remarks on board the	27th	Day of	January
1						Strong Strong gale with rain from E.N.E. Raised the M. & took the bound off the Lib. Made several shots off Elephant point, & the wind increasing to a gale had some difficulty in weathering this island & reef off that point. The harbor made a fine shelter by running through the kelp & anchoring under the lee of Bleking island, in a small cove in the Western part of this island - where we rode securely in 2 1/2 fath. - amidst a violent gales, rain, lightning & thunder - About noon the wind veered to South & increased in violence, & continued till sunset when the rain subsided & the gale abated & varied gradually, W. A small vessel rode snugly, protected from a mountainous sea by Bleking island. Disappointment island, & as the wind varied to the N.W. by the Pt. of the Maline, called St. Elephant Pt. & the kelp extending athwart the passage between these lands. We were very fortunate, having gained this harbor for there is no other for some distance either E. or W. of it. It seems pay to expatiate on the Madatut manner in which Mr. Jan

									ning conducted her into port. Although our quarters deck proved leaky, we spent the time very pleasantly - waited on Smokey Elephant longer - smoked our pipes, related anecdotes & slept to our satisfaction.

* anxiety island

Ship *Floop Magellan* from *Jacks Harbor* towards *Port Williams*

H.	K.	F.	Courses.	Winds.	Lee-way.	Remarks on board the 28 th Day of January 1818				
1						The morning hazy, with a moderate breeze at N.W. at 4 a.m. with some difficulty by reason of the help & the want of a sufficient strap, got our anchor to the bow - Steered to the N. between <i>Black</i> island & the <i>Malone</i>. Direction through from N.W. to N.E. after making several tacks, weathered the N.E. end of <i>Black</i> island, being about 3 or 4 leagues from N.E. to S.W. in length. A harbor is formed on the eastern side by a small island situated in a handsome sandy bay - designated by another island lying opposite at the distance of from 1 to 2 miles from the island forming the harbor - Having cleared <i>Black</i> island - steered E.N. for the outer part of two or three islands between which & <i>Malone</i> there is said to be no passage except for boats. Distance from <i>Black</i> island about 2 leagues. Eastward of these islands the Spanish <i>Malone</i> makes a long & narrow neck of land around which is the passage to <i>Backley's</i> Sound, leaving on the starboard hand two small islands - the inner one four times the largest of the two, about South, distant between 2 miles & a league from the <i>Malone</i>, which may be seen 4 or 6 miles distant. Although there is a passage for small vessels within these islands it ought not to be attempted but in extreme cases - From these islands which I call <i>Magellan</i> islands N.E. about 2 leagues lies the outer point of several islands, called the <i>Volunteer</i> islands. Steered over till near the help on the S.W. of them and tacked to the W. The wind blowing strong from N.W. directly out of the Sound.

hand and a small one the 2^d from the *Malone* on the S.W. & formed 2 paths through the help - there are several reefs in it - caution is necessary in going through - N. the land being S.E. is not the *Malone* but is insulated - there is a boat passage around it.

Friday

Ship from towards

H. K. F. Courses. Winds. Lee-way. Remarks on board the 30th Day of January

1
2 out of Port Magellan E.S.E. The direction of the Malones
3 Past within all the Portway — The Eastern & much the largest being
4 about a mile in length from N.E. to S.W.
5
6 The shore land on this part of the
7 Spanish Malones is of ordinary height, and of a beautiful form
8 It is most of the Southern part of it. About a league inland runs
9 a ridge of Mountains in a N.E. & S. direction.
10 English breezy & rough seas. At the Distance of 5 leag. made
11 port William — where, off the entrance we discovered our two boats
12 Mr Johnson and 3 of the Fox & of the King in command of them
1 of these gentlemen we were informed that they had discovered
2 about 100 Elephants — some of which were at this place. — according to
3 report into the harbor & came to anchor — we were soon joined
4 by the above gentlemen, having some fine fresh pork with them
5 which they had taken at Labrador's bay. — The next port to the N.
6 The all made an extraordinary hearty breakfast — enjoying it the
7 more by reason of the company of our brother officers.
8 Went on our excursion for guns & Elephants. The latter seem to
9 be in the N.E. about 5 miles to the N.E. of the bay. That about a day
10 got, & took 25 elephants — a light breeze at N.W.

Course. Dist. Diff. Lat. Dep. Lat. by D. R. Lat. by Obs. Mer. Dist. Diff. Long. Long. in. Bearing and Distance.

H. K. F. Courses. Winds. Lee-way. Remarks on board the 31 Day of January

1
2 The weather rainy with the wind at
3 N.W. At Day-light Mr Johnson in his boat set out for the Ship
4 Mr Baker & of the Brig Jane Maize, & Mr Fox in their boats went
5 for the blubber of the elephants taken yesterday. After having
6 taken on board the blubber done of the boats, made the best of our
7 way to return to the Portway — When we had proceeded about
8 4 miles the wind became light & varied to the S. & thence to S.E. &
9 increased to a gale directly on shore — we however gained the
10 lee of the Portway, and anchored about 4 miles from the largest
11 island — The E. P. bearing E. & the S. P. S.W.
12

Land on the largest island & took 23 elephants

crew having gone on shore for night quarters and his — prevented our taking a stroke on shore

Thursday

Ship *Hoop Magellan* from Port Williams towards Eagle Island

H.	K.	F.	Courses.	Winds.	Lee-way.	Remarks on board the 5 th Day of February			
1				N.W. by E.		Fresh breeze, with cloudy sky.			
2									
3						At 5 o'clock a loud sound. At 6 opposite Sheffield's			
4						harbour - bearing N.E. from the N. Volunteer, about 2 leagues distant			
5						at small island situated where the sound narrows & trends up to the forming			
6						this harbour; there is a small island about 1/2 mile to the S. of it. Blauvelt's			
7						harbour is situated about a league to the S. of Sheffield's, & at short distance			
8						around a Pt. of the ell. where it trends off S.W. by W. for 1 1/2 leagues			
9						From Blauvelt's to Sheffield's harbour the ell. trends nearly N.E. From Blauvelt's			
10						Pt. to the N. Volunteer the course is nearly N.E. 3 leagues distant from			
11						Blauvelt's (forming the harbour): the course to the Pt. of the ell. forming			
12						the S.W. entrance to B. Sound is south 8 miles - Off this Pt. lies two small			
1						islands; the outer one being much the smallest - there is a steep papaya			
2						between these & the Pt. but it is dangerous, as it proved to us, as we			
3						in attempting to go through it run a ground where we remained			
4						several hours but received but little injury except the loss of our			
5						false keel - From this Pt. which I call Pt. Magellan the ell. trends			
6						N.E. by E. to the opposite Blauvelt's harbour - there is another			
7						point, which in fact is the principle one forming this entrance			
8						of the sound, which lies off E. about a mile or 1/2 mile distant & is the			
9						outer one - About 3 P.M. got her off the bar, warped her a cable length			
10						to the N. got under way, made a few tacks & anchored off the inner Pt.			
11						Course. Dist. Diff. Lat. Dep. Lat. by D. R. Lat. by Obs. Mer. Dist. Diff. Long. Long. in. Bearing and Distance.			
12						the Pt. of the island S.E. The wind W. by S. considerably unfavourable to proceed			
						landed and found excellent berries in abundance.			

H.	K.	F.	Courses.	Winds.	Lee-way.	Remarks on board the 6 th Day of			
1						Light breeze from N.E. & hazy sky - At sun			
2						rise got under way and with the assistance of our oars got out of the sound			
3						leaving the islands on the starboard & a dry rock about the size of			
4						a ship's hull on the bar. From the small, outward island off Pt. Magellan			
5						Blauvelt's island bore S.W. by W. distant 10 miles - When off the entrance			
6						of Barkly Sound, it appeared to run up to the base of the Mountain on			
7						the French Malone, in a N.N.W. direction - there is however exten-			
8						sive low land bordering on the N. part of the sound. The Western part			
9						of the high land in sight bore N.W. Blauvelt's Pt. N.W. 10 miles, the small			
10						island off the Pt. N.N.W. 1/2 mile, the low rock S.W. 2 miles.			
11						To the S. & W. of the Pt. of the Malone forming this entrance of the			
12						sound, lie three islands, from 1/2 to 3/4 mile in length -			
1						Nearly calm till 4. Then a fresh breeze S.W. by S. continued beating			
2						against our back sea, & the tides making against us. about 6 P.M. bore			
3						up and against us into the sound, where we anchored opposite our			
4						cove, about 1/2 mile to the N. of our former berth -			
5						Mont on shore. I eat berries - they were now			
6						the more relished as our stock of bread is expended.

NAUTICAL BOOKS AND CHARTS,

PUBLISHED BY

Edmund M. Blunt,

No. 202, WATER STREET, NEW YORK.

A new and much improved **CHART OF THE COAST OF NORTH AMERICA**, commencing at New-York and extending to the Gulf of Mexico, on seven sheets. [On this Chart the whole Southern Coast is delineated; when it arrives at lat. $27^{\circ} 50'$ N. an additional sheet is annexed, which correctly points out the passages over the Bahama Bank, through Providence Channel, together with the tracks down the Island of Cuba, to New Orleans, &c.] The Editor submits this to the inspection of nautical gentlemen as a valuable production, and excelling in utility all Charts ever published of the Coast of North America.

A NEW CHART OF THE MISSISSIPPI RIVER, with directions.

A NEW CHART OF THE COAST OF NORTH AMERICA, from New-York to Machias Bay.

A new and improved **CHART OF THE GULF AND RIVER ST. LAWRENCE**, extending from Machias Bay to Belle Isle.

Chart of the **COAST OF LABRADOR**, from the Straights of Belle Isle to Sandwich Bay.

A new and correct Chart of **LONG ISLAND SOUND**, from Montauk Point to Frog's Point, including Fisher Island, and Watch Hill Reef.

[The above includes the whole Coast of North America.]

Two new and correct Charts of the **WEST INDIES**, on large and small scales.

A Chart of the **ATLANTIC OR WESTERN OCEAN**, on an improved plan. [This chart being generally used to prick off the tack of the ship, the compass is laid down without extending the lines across the sheet, by which sufficient room is left for remarks, which is an improvement adopted on all modern charts, and gives it a decided preference over any other of the Western Ocean now extant.] A pamphlet containing the variations in different latitudes, accompanies this Chart.

SEAMANSHIP, both in Theory and Practice, to which is annexed, an Essay on **NAVAL TACTICS AND SIGNALS**—also, Regulations for the government of the Navy of the United States of America, with Observations and Instructions, for the use of the commission of the junior and other Naval Officers, on all the material points of professional duty. Including also, forms of general and particular orders, for the better government and discipline of armed ships; together with a variety of new and useful Tables; among which are general Tables for watching ships companies in all cases; for showing the stations of the different officers at quarters; for the general appropriation of men at quarters, in ships of every class; for furling sails; mooring and unmooring; making and shortening sail; tacking ship, &c. &c. with a system of **NAVAL DISCIPLINE**.

NAUTICAL ALMANACS for 1816, 1817, and 1818, to be continued annually.

AMERICAN PRACTICAL NAVIGATOR.

AMERICAN COAST PILOT, giving directions for navigating the American Coast and West Indies.

LOG BOOKS & **JOURNALS** of every description.

February, 1816.
